

This chart is for guidance only and should be read in conjunction with the ACCC Care labelling for Clothing Guide which specifies the mandatory standards for care labelling based on the Australian/New Zealand Standard (AS/NZS) 1957:1998, Textiles—Care labelling with variations and additions made by Consumer Protection Notice No. 25 of 2010.

Additional symbols may be used to clarify the instructions but symbols alone are not sufficient. As a minimum, laundering instructions include (in order) four symbols: washing, bleaching, drying, and ironing. Drycleaning instructions include one symbol. Professional Wet Cleaning symbols are included for information only as they are not currently recognised in Australia.

The washtub symbol tells you how the garment should be washed. The number inside the washtub is the maximum wash temperature. A bar underneath the washtub indicates that the garment should have mild treatment or washed using the Permanent Press setting. Two lines underneath the washtub indicate gentle or delicate treatment.

95°C

Do not dry

Ironing

The Iron symbol provides information on how the garment should be ironed. A system of dots indicates the acceptable temperature range for ironing.

Cool Iron

Warm Iron

Hot Iron

Do Not Iron

No Steam
(added to iron)

Drycleaning

The letters within the circle are intended for professional textile cleaners. They give information on the solvents that can be used during the cleaning process.

The bar below the circle indicates that certain limitations in the dry-cleaning process are required. These may concern mechanical action, addition of moisture, and/or drying temperature.

Any Solvent Except Trichloroethylene

Petroleum Solvent, Liquid Silicone

Any Solvent

Dry clean in accordance with F with strict limitation on amount of water, Reduced mechanical action, Low Drying Temp

Dry clean in accordance with P with strict limitation on amount of water, Reduced mechanical action, Low Drying Temp

Do Not Dryclean

Professional Wet Cleaning

The symbol for wet cleaning is used for articles which may be treated in water by a professional wet-cleaning process.
